

UCSF Lab Seeking Volunteer Research Assistants

LAB DIRECTOR

Aoife O'Donovan, Ph.D.

LOCATIONS

- UCSF
- San Francisco VA Medical Center

REQUIRED QUALIFICATIONS

- Passion for **science** and **health**.
- Strong academic performance with an intended major in **psychology, biology, immunology, computer science, or engineering**. Post-baccalaureate students are also encouraged to apply.
- Ability to work **two full days** each week on location at SFVAMC.
- **One-year commitment**.
- Strong computer literacy (including **Word and Excel**).
- Strong willingness to learn **research methods**.
- Ability to function effectively in **dynamic workplace** (tasks vary frequently).
- Excellent **interpersonal skills**.

DESIRED QUALIFICATIONS

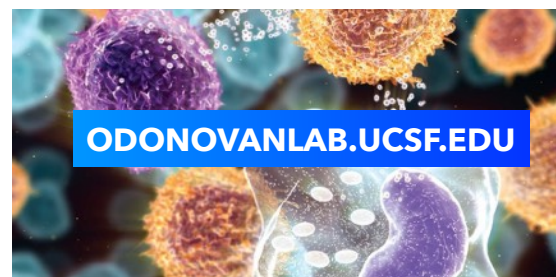

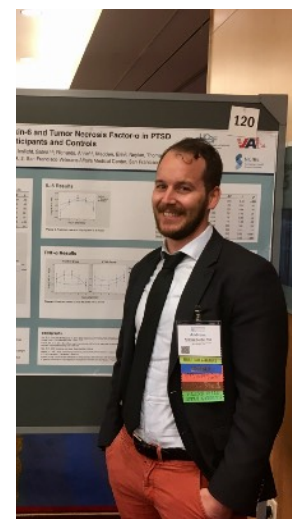

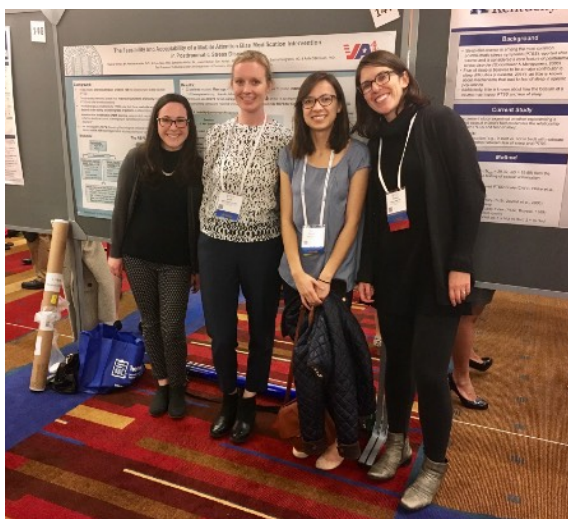

- Ability to work independently.
- Interest in learning more about **post-traumatic stress disorder**.
- Experience with Mac and PC.

REQUIRED APPLICATION MATERIALS

- Cover letter
- CV/Resume
- Most recent academic transcript (unofficial copies are accepted)

Looking for an exciting research experience before medical or graduate school? The **THRIVE** (Trauma and Health Research on Immunity, Vitality and Emotions) **Lab** is hiring. We're focused on revealing how **psychological stress** drives the development of mental and physical disorders like **PTSD**.

Volunteer Research Assistants will develop research studies, screen and run study participants, help with computerized psychological tasks, conduct literature reviews, analyze study data, prepare manuscripts, **and more**.

For a more complete job description or to submit materials, email ucsfthrive@ucsf.edu.

Applications are reviewed on a rolling basis.
